

What is bWAPP?

ME | IT Audits & Security

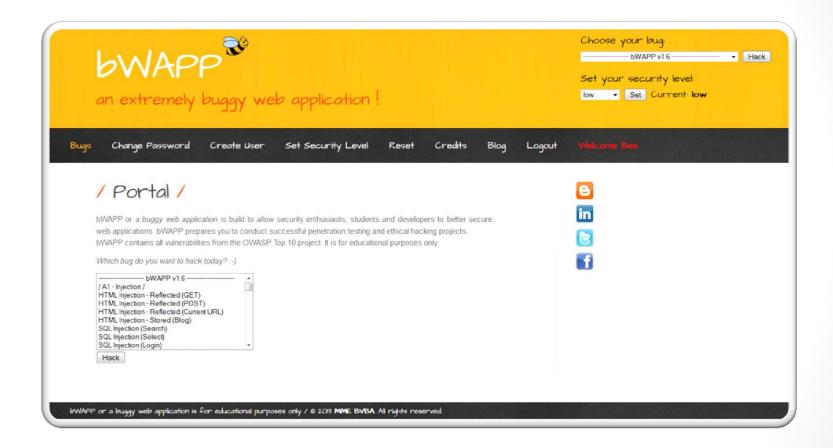

bWAPP == extremely buggy

- bWAPP, or a buggy Web APPlication
- Deliberately insecure web application
- Includes all major known web vulnerabilities
- Helps security enthusiasts, developers and students to discover and to prevent issues
- Prepares for successful penetration testing

Testimonials

Awesome! It's good to see fantastic tools staying up to date ...

- Ed Skoudis Founder of Counter Hack

I just installed bWAPP 1.6 into the next release of SamuraiWTF ... Its a great app ...

- Justin Searle Managing Partner at UtiliSec

Great progress on bWAPP BTW!:)

Vivek RamachandranOwner of SecurityTube

About me

Email <u>malik@mmeit.be</u>

LinkedIn <u>be.linkedin.com/in/malikmesellem</u>

Twitter <u>twitter.com/MME_IT</u>

Blog <u>itsecgames.blogspot.com</u>

- Architecture
 - Open source PHP application
 - Backend MySQL database
 - Can be hosted on Linux/Windows using Apache/IIS
 - Can be installed with <u>WAMP</u> or <u>XAMPP</u>

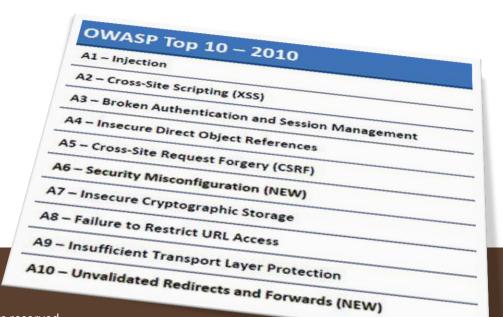

- Features
 - Very easy to use and to understand
 - Well structured and documented PHP code
 - Different security levels (low medium high)
 - 'New user' creation
 - Reset and reinstall database feature
 - Email functionalities
 - 'Evil' directory including attack scripts

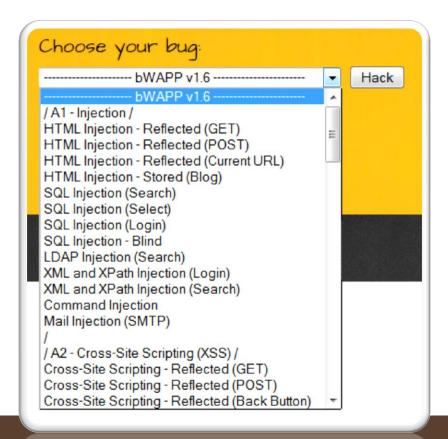

- What makes bWAPP so unique ?
 - Well, it has over 60 web bugs!
 - Covering all major known web vulnerabilities
 - Including all risks from the OWASP Top 10 project

Which bug do you want to hack today ?

Cross-Site Scripting - Reflected (Back Button)

- Which bug do you want to hack today ? (1)
 - Injection vulnerabilities like SQL, XML/XPath, LDAP, HTML,
 Command and SMTP injection
 - Cross-Site Scripting (XSS), Cross-Site Tracing (XST) and Cross-Site Request Forgery (CSRF)
 - Authentication, authorization and session management issues
 - Malicious, unrestricted file uploads
 - Arbitrary file access and directory traversals
 - Local and remote file inclusions (LFI/RFI)
 - Parameter tampering

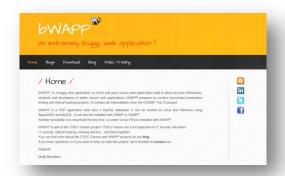

- Which bug do you want to hack today ? (2)
 - Configuration issues: Man-in-the-Middle, Cross-domain policy file, information disclosures,...
 - HTTP parameter pollution and HTTP response splitting
 - Denial-of-Service (DoS) attacks
 - HTML5 ClickJacking, Cross-Origin Resource Sharing (CORS) and web storage issues
 - Unvalidated redirects and forwards
 - Insecure cryptographic storage
 - And much more ©

- Meet the bee-box... a home for our bee
- VM pre-installed with bWAPP
- LAMP environment: Linux, Apache, MySQL and PHP
- Requires zero installation
 - Made for those who are really lazy ©
 - Reduces the 'how to use bWAPP?' SPAM in my mailbox

- bee-box is also made deliberately insecure...
- Gives you several ways to hack and deface bWAPP
 - Even possible to hack the bee-box to get full root access!
- Opportunity to explore all bWAPP vulnerabilities
- Hacking, defacing and exploiting without going to jail
- You can download bee-box from here

- Features (1)
 - Apache, MySQL and PHP installed and configured
 - Postfix installed and configured
 - .htaccess files support enabled
 - AppArmor disabled
 - PHP LDAP extension installed
 - Tuned file access permissions

- Features (2)
 - Configured with a self-signed certificate (SSL)
 - Some basic security tools installed
 - Shortcuts to start, install and update bWAPP
 - An amazing wallpaper ©
 - And last but not least, an outdated Linux kernel...

- Both are part of the ITSEC GAMES project
- A fun approach to IT security education
- IT security, ethical hacking, training and fun...all mixed together

- Ready, set, and hack !
- There's only 1 thing to remember
- The logon credentials are...

bee/bug

- Ready, set, and hack !
- There's only 1 thing to remember
- The logon credentials are bee/bug
- So please don't SPAM me anymore

- More credentials (for wizkids only)
 - bWAPP
 - bee/bug
 - bee-box
 - bee/bug
 - Super user: bug
 - MySQL
 - root/bug

- Installation and configuration
 - Install VMware Player, Workstation or Fusion
 - Install and start the bee-box VM
 - Configure or check the IP settings
 - Browse to the bWAPP web app
 - http://[IP]/bWAPP/
 - Login with bee/bug

- Host file (optional)
 - Change the host file on the local machine

```
For example:
           102.54.94.97
                         rhino.acme.com
                                                   # source server
            38.25.63.10
                          x.acme.com
                                                   # x client host
     localhost name resolution is handled within DNS itself.
          127.0.0.1 localhost
                         localhost
 # Replace 10.0.1.51 with YOUR bee-box IP :)
10.0.1.51
               itsecgames.com
10.0.1.51
               intranet.itsecgames.com
10.0.1.51
               attacker.com
```

- Postfix (optional)
 - Reconfigure and restart Postfix on the bee-box
 - sudo gedit /etc/postfix/main.cf
 - sudo /etc/init.d/postfix restart

```
myhostname = bee-box
alias_maps = hash:/etc/aliases
alias_database = hash:/etc/aliases
myorigin = /etc/mailname
mydestination = itsecgames.com, bee-box, localhost.localdomain, localhost
# Replace the hostname with the hostname of YOUR SMTP provider :)

mynetworks = 127.0.0.0/8 [::ffff:127.0.0.0]/104 [::1]/128

mailbox_size_limit = 0
recipient_delimiter = +
inet_interfaces = all
```

bWAPP training

- Attacking & Defending Web Apps with bWAPP
 - 2-day comprehensive web security course
 - More info: http://goo.gl/ASuPa1 (pdf)
- Plant the Flags (PTF) with bWAPP
 - 4-hour web security workshop
 - Perfect for your conference or group event!
 - More info: http://goo.gl/fAwCex (pdf)

bWAPP training

Thanks!
